SKINVIVE™

SHINE *that*
SPEAKS

Enhanced SKIN QUALITY with
HYDRATION. ELASTICITY. RADIANCE.

FDA
APPROVED

Micro-Injectable
Hyaluronic acid**

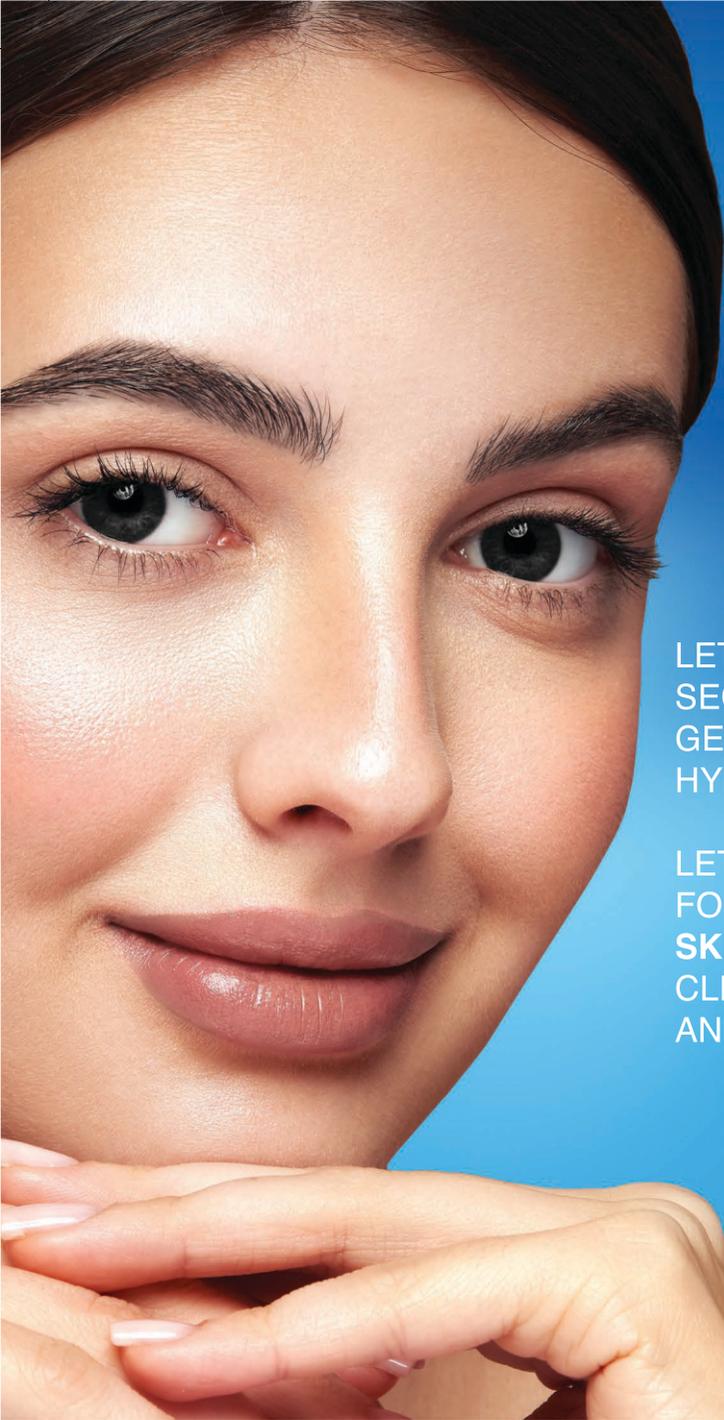

2X
hydration¹

Upto 9 months
hydration with
single treatment²

For all
skin types³

LET'S UNCOVER THE
SECRET.
GET **LONG-LASTING***
HYDRATION[†].

LET'S LOOK DEEP WITHIN.
FOR **HEALTHY-LOOKING**
SKIN THAT GIVES YOU A
CLEAR[‡], SMOOTH[§]
AND RADIANT^{||} SKIN.

*Long lasting is up to 9 months following a single treatment.²

[†]Instrument measures of skin hydration, smoothness, and skin deformation parameters were performed on the cheek, forehead, and neck of one side of the face on Day 0 and at 30 days after initial treatment (before touch up), Months 1, 4, 6, and 9 after the last treatment, and Month 1R. Skin hydration was measured using the MoistureMeterD instrument (n=131) and top-up treatment administered at Day 30 (n=31).²

[‡]Lasting up to 9 months as reported by 63% of patients. As reported by 127 of 131 patients in a composite satisfaction score, which includes how radiant their facial skin looked.⁴

[§]Lasting up to 9 months as reported by 64.6% of patients. As reported by 127 of 131 patients in a composite satisfaction score, which includes how clear their facial skin looked.⁴

[§]Lasting up to 9 months as reported by 55.1% of patients. As reported by 127 of 131 patients in a composite satisfaction score, which includes how smooth their facial skin looked.⁴

^{||}Lasting up to 9 months as reported by 63% of patients. As reported by 127 of 131 patients in a composite satisfaction score, which includes how radiant their facial skin looked.²

**Refresh* your skin and hydrate
from within† to get clear,‡
smooth,§ radiance|| that lasts^{2,¶}**

*Lasting up to 9 months as reported by 51.2% of patients. As reported by 127 of 131 patients (2 subjects did not respond) in a composite satisfaction score, which includes how refreshed their facial skin looked.⁴
†Data derived from a prospective, non-randomised, interventional, open-label study where 11 healthy patients (men [n=2] and women [n=9]) received intradermal VVC-12L treatment on the volar forearm. Clinical probes assessed skin quality at baseline and Months 1 and 3 post-treatment. Punch biopsies were collected at Months 1 and 3 post-treatment to evaluate histologic and genomic changes.¹³

Enhance your skin's natural hydration with SKINVIVE™²

OVER 90% OF SKINVIVE™
PATIENTS WERE **SATISFIED** WITH THEIR RESULTS^{†4}

[†]Subjects completed the FACE-QSatisfaction With Skin scale at baseline (day 0, before treatment), months 1, 4, 6, and 9 (before the repeat treatment, if received), and month 1 after the repeat treatment (n=127).⁴

For our skin to look at its best, **hydration is essential.**^{5,6} Its **surface, texture, elasticity, tone and radiance** (ability to reflect light) are all largely determined by its hydration.⁶⁻⁹

SKINVIVE™ is hyaluronic acid treatment that can be injected into the dermis of face, décolletage and hands.¹ It can offer long-lasting* skin hydration and improve the appearance of roughness and fine lines.²

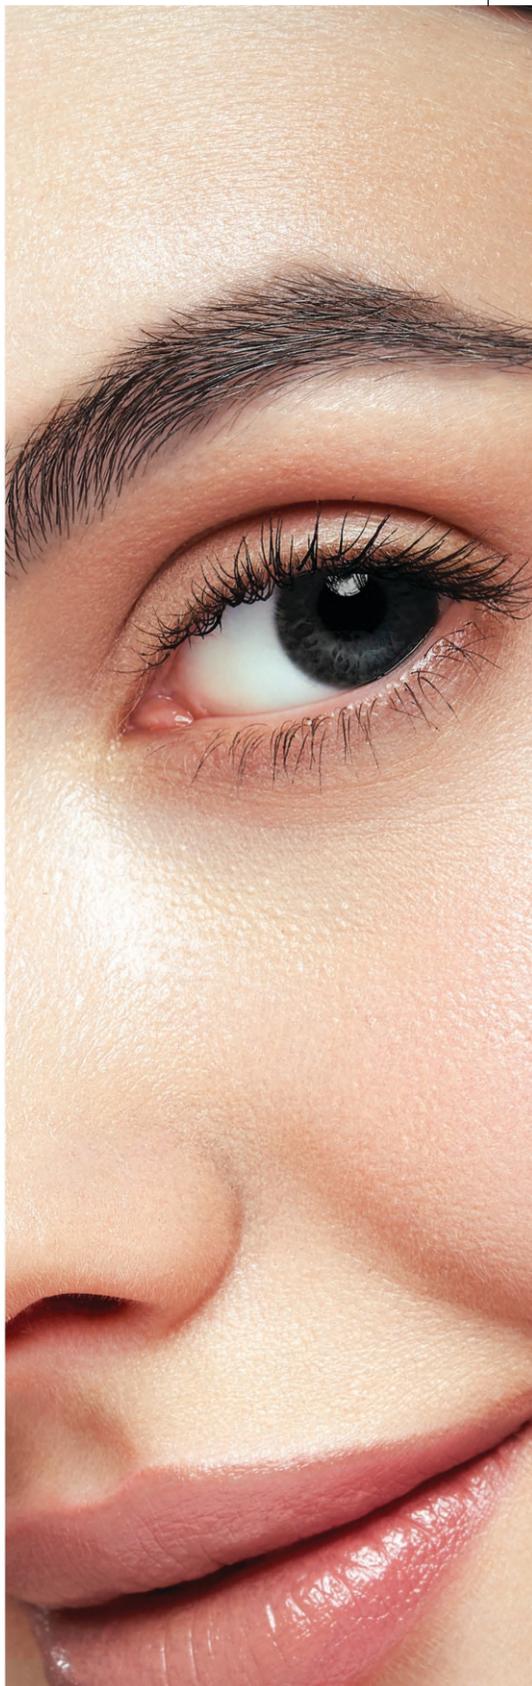

And, unlike topical creams which only target the surface,¹⁰ SKINVIVE™ targets the deep layers of your skin, offering hydration from the inside out.¹ So how does it work?

- ◆ SKINVIVE™ attracts and retains water, using hyaluronic acid to increase your skin's natural hydration¹¹⁻¹³
- ◆ SKINVIVE™ increases hydration where it's needed and improves skin smoothness, fine lines and elasticity after just one treatment²
- ◆ SKINVIVE™ increases expression of a naturally occurring hydration marker deep in your skin over time,^{#14} to offer long-lasting hydration for up to 9 months²

*Long lasting is up to 9 months following a single treatment (n=131).²

[#]Data derived from a prospective, nonrandomized, interventional, open-label study, showed increased epidermal expression in aquaporin-3 at Months 1 and 3 following a single treatment with SKINVIVE™.

¹¹ healthy men (n = 2) and women (n = 9) received intradermal SKINVIVE™ treatment on the interior forearm. Clinical probes assessed skin quality at baseline and months 1 and 3 post-treatment. Punch biopsies were collected 1 and 3 months post-treatment to evaluate histologic and genomic changes.¹⁴

Your SKINVIVE™ treatment

Wishing for smoother-looking skin? Here are some things you'll need to know about what happens before, during and after your SKINVIVE™ treatment.

Before treatment

During your consultation, your practitioner will work with you to craft a treatment plan that meets your unique needs and goals.¹⁵ As well as the areas you'd like to focus on, they'll consider the levels of hydration across your face, neck and décolletage. Discuss with your healthcare professional if SKINVIVE™ is right for you and possible risks. You should not use SKINVIVE™ if you are pregnant or breastfeeding.

On the day

Depending on your chosen treatment, your appointment will last from 20 minutes to an hour.¹⁶ And, to make your experience as comfortable as possible, SKINVIVE™ contains Lidocaine, a mild local anaesthetic.⁴

After treatment

What's the downtime like?

With a minimal impact on daily life, your SKINVIVE™ treatment will likely have minimal disruptions to your normal activities. In fact, at least 94% of our patients return to their normal social activities after just 1 day.⁴

What potential side effects may I get?

You may experience potential side effects after treatment with SKINVIVE™, which may occur immediately or may be delayed. These include: inflammatory reactions (redness, oedema, erythema, etc), haematomas, induration or nodules, staining or discolourations at injection site, etc.

Please refer to SKINVIVE™ Direction For Use (DFU) for a full list of side effects.

Will I bruise or have lumps?

Your specially trained Healthcare Practitioner will select the best administration for you, reducing any risk of bruising or lumps.

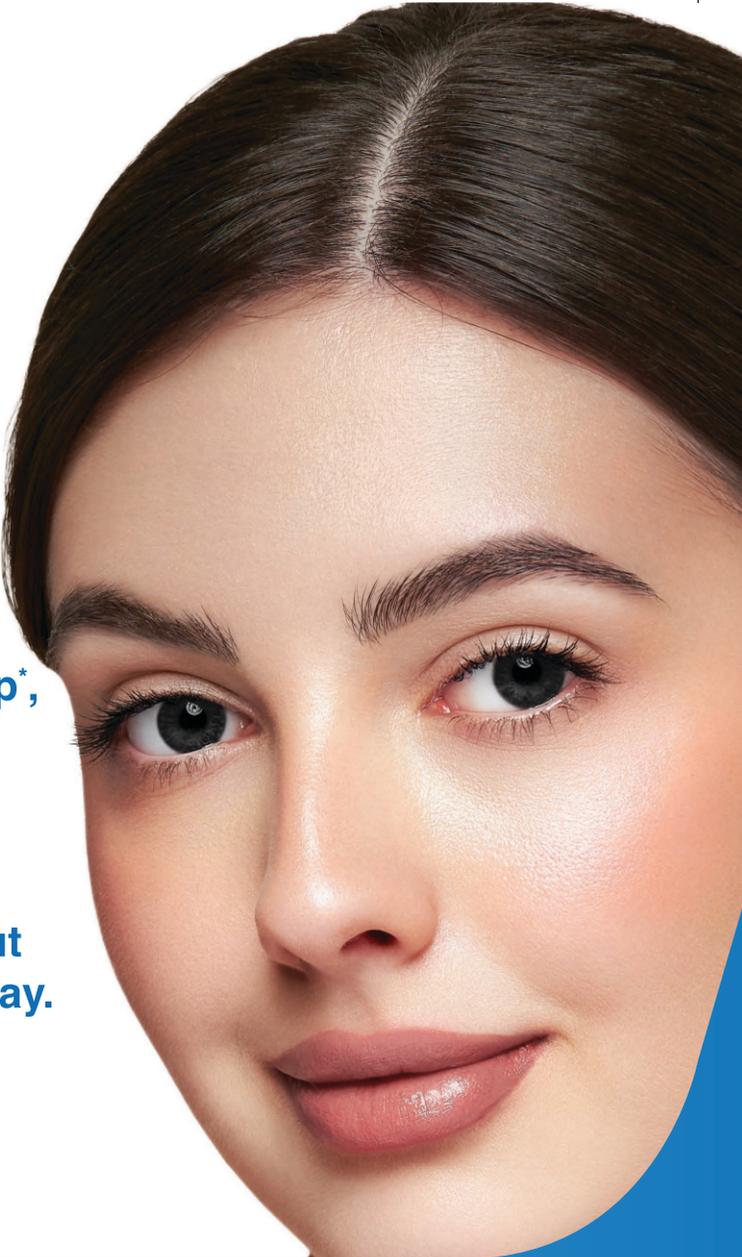

How did patients say that their skin improved?

More than 90% of patients (N=127) were satisfied with the appearance of their skin 1 month after treatment,⁴ and the majority were satisfied with the radiance, health, colour and tone of their skin up to 9 months following treatment with SKINVIVE™.⁴

SKINVIVE™ PATIENTS WERE
SATISFIED WITH THE RADIANCE,
HEALTH, COLOUR AND TONE OF
THEIR SKIN FOR **UP TO 9 MONTHS**
FOLLOWING TREATMENT³

*Patients completed the FACE-Q Satisfaction with Skin Scale at baseline (day 0, before treatment), months 1, 4, 6, and 9 (before the repeat treatment, if received), and month 1 after the repeat treatment (N=127).⁵

**It's time for deep*,
